**Subject:** Weekly staff meetings

Good morning Chris.

I will be airborne during the R2 staff and senior staff meetings... Will rely on you and Walter to carry these and report back to me.

I am not sure what the plan is for RA's to report at the afternoon meeting with the Administrator, given we will all be assembled at the forum in Rosemont. I have attached the weekly highlights, in case you are required to make the report for me.

Will check in with you periodically.

Sincerely,

Pete

REGION 2 WEEKLY HIGHLIGHTS TO ADMINISTRATOR  
WEEK OF 04/12/18

Hot Issues:

**not responsive**

**Limetree Bay Terminal (LBT), St. Croix, USVI, Air Permit Questions:** On 4/5 the Assistant Administrator for Air signed EPA's response to questions raised by LBT regarding its plans to restart refinery operations at the facility. EPA concurred that: (1) restarting of the refinery's idled units for the MARPOL Project should not be treated as a new stationary source under the current Reactivation Policy; (2) the MARPOL Project and the Renewable Diesel Fuel Project are independent of each other and therefore separate projects for PSD applicability; and (3) constructing the Single Point Mooring project would be considered a modification to an existing emissions unit rather than a new emissions unit.
